Welcome to APDS Assist!

We are here to help you:

- Understand and navigate our program services
- Understand your insurance requirements for Joenja
- Put you in connection with additional resources, including our APDS Clinical Educators (ACEs)*

APDS Assist can help you every step of the way

APDS Assist Care Coordinators

Help you understand your insurance coverage and support options when you are prescribed Joenja

APDS Clinical Educators (ACEs)*

Here to advocate, educate, and be a compassionate resource for you and your family

APDS Assist Specialty Pharmacists

Are able to answer questions about taking Joenja

*Please note that ACEs do not offer medical or treatment advice or replace discussions with a physician.

My ID Smart Watch Sleeve

The My ID Smart Watch Sleeve is an easy way to keep your medical information with you wherever you go. Your ACE can help you set up your My ID Smart Watch Sleeve and help you create your Emergency Care plan.

Please see reverse side for Important Safety Information.

Connect with your Care Coordinator at APDS Assist

- Call 1-877-796-APDS (2737) from 8AM to 8PM ET, Monday through Friday
- An APDS Assist Care Coordinator can also connect you to an APDS Assist Specialty Pharmacist

Ways APDS Assist can help you with Joenja

Starter Program

- Our commitment is to get you started on Joenja as quickly as possible while we work with your doctor's office to process insurance requirements

Patient Support

- Local and nationwide support groups and online resources are available to you
- Your ACE can help you find these resources

Coverage

- Helping you secure access to Joenja is the primary objective of APDS Assist
- Depending on your insurance, an APDS Assist Care Coordinator can help you find additional support

APPROVED USE

JOENJA[®] (leniolisib) is a prescription medicine that is used to treat activated phosphoinositide 3-kinase delta (PI3Kδ) syndrome (APDS) in adults and children 12 years of age and older.

IMPORTANT SAFETY INFORMATION

Tell your healthcare provider if you are pregnant or plan to become pregnant. JOENJA may harm your unborn baby. Your healthcare provider will do a pregnancy test before you start receiving JOENJA.

Use effective birth control to prevent pregnancy while taking JOENJA and for one week after you stop taking JOENJA. If you plan to become pregnant, continue taking your birth control for one week after stopping JOENJA. Talk to your doctor about what type of birth control method is right for you while taking JOENJA.

It is not known if JOENJA passes into your breast milk. Talk to your doctor about the best way to feed your baby if you take JOENJA.

Tell your healthcare provider about all the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements. JOENJA and certain other medicines may affect each other.

Tell your healthcare provider if you are scheduled to receive an immunization (vaccine). JOENJA may affect how well a vaccine works.

Know the medicines you take. Keep a list of your medicines and show it to your healthcare provider and pharmacist when you get a new medicine.

The most common side effects of JOENJA include headache, inflammation of sinuses, and dry, itchy, and inflamed skin (eczema). These are not all the possible side effects of JOENJA. Tell your healthcare provider about any side effect that bothers you or does not go away.

You can also report negative side effects to FDA at 1-800-FDA-1088 or www.fda.gov/medwatch, or Pharming Medical Affairs at (800) 930-5221.

For more information, please see the accompanying full Prescribing Information or go to www.JOENJA.com.
